Hi NA,

It sounds wonderful that APA formatting feels smoother when you put in the effort. Running heads and page numbers are sometimes hard to figure out in the beginning. Grammarly is really helpful to me when writing large essays because it helps me catch little errors I might overlook (Mohammed & AL-Jaberi, 2021). Being more at ease with Word will surely be useful both during your studies and in your future work where easy-to-read writing counts.
